User Experience Graduate
CGI
October 2026

Dear Hiring Manager,

I am applying for the User Experience Graduate position at CGI. I am currently completing an MSc in UX Design at Edinburgh Napier University and expect to finish by mid-March 2027. Prior to my MSc, I spent nearly four years at MAPAL-OS in client-facing roles across business development and digital learning design.

As a Digital Learning Designer, I worked directly with enterprise clients including BrewDog, Levy UK & Ireland and KellyDeli to understand their challenges and develop user-centred digital learning experiences. Much of my role was consultancy-focused, involving requirements gathering, stakeholder engagement, journey mapping and iterative design. My earlier Business Development role also strengthened my ability to communicate with stakeholders and balance user needs with business objectives.

Through my MSc, I have developed my skills in user research and inclusive design. As part of an RSE research project developing a companion robot for young children, I have worked alongside engineers, conducted user interviews, designed surveys and carried out usability testing. I have also analysed qualitative and quantitative data to identify insights and inform design decisions.

I am particularly drawn to CGI's Government and Justice team because of the opportunity to use research to improve public services. I believe my consultancy experience, combined with my research skills and interest in accessible, user-centred design, would allow me to contribute to the team while continuing to develop as a researcher.

Thank you for your time and consideration. I look forward to hearing from you.

Kind regards,
Hugh Kelly
