UX Design Summer Intern 2027
Graphcore
October 2026

Dear Hiring Manager,

I am applying for the UX Design Summer Intern 2027 position at Graphcore. I am completing an MSc in UX Design at Edinburgh Napier University, finishing in September 2027. I am excited by the opportunity to make complex AI software easier for developers to understand and use.

Before my MSc, I spent nearly four years at MAPAL-OS in digital learning design and business development. Working with clients including BrewDog, Levy UK & Ireland and KellyDeli, I gathered requirements, mapped user journeys and refined digital experiences through stakeholder feedback. This taught me to communicate design decisions and balance users' needs with business constraints.

Through my MSc, I explored challenges within hospitality in my Roost project. User interviews and journey mapping helped me identify friction in the experience; I used those insights to develop Figma wireframes and interactive prototypes to explore solutions to those problems. I learned the importance of testing assumptions early and allowing research to shape interface decisions. In a separate companion robot research project for children, I collaborated with engineers, designed questionnaires and supported usability testing, building confidence working across disciplines.

Graphcore appeals to me because the role combines research, interface design and close collaboration with engineers on specialist tools. I would welcome the chance to contribute to Decagon, learn how reusable components create consistent experiences and refine my work through feedback from the team.

Thank you for your time and consideration. I look forward to hearing from you.

Kind regards,
Hugh Kelly
